OC AEROSOLS

THE FINEST TRAINING AIDS FOR THE FINEST PRODUCTS

First Defense® is the world's most widely used pepper spray in law enforcement and corrections. In recognizing the diverse environments and challenges our public safety professionals face each day, our comprehensive First Defense line utilizes a color code system to identify the intensity of that product.

The First Defense family of OC aerosol sprays are EDW safe.

THE SAFARILAND TRAINING GROUP

LESS LETHAL INSTRUCTOR // PROGRAM

This hallmark program provides the necessary training for a changing world. The program is comprised of four 8-hour instructor level classes covering OC Aerosols, Less Lethal Impact and Chemical Munitions and Distraction Device® models. The student will acquire a general working knowledge of Defense Technology® products, both technically and tactically, along with the skills necessary to conduct in-service training.

Contact the Safariland Training Group for details to take or host this course.

NON-PYROTECHNIC CHEMICAL GRENADES

Defense Technology® offers a large assortment of grenades providing munitions for most any tactical situation. These non-pyrotechnic chemical grenades provide heavy concentrations of payload that immediately contaminate the area and are non-flammable and safe for indoor usage.

AEROSOL OC VAPOR

- Delivers a very high concentration of agent in a powerful mist and requires very minimal decontamination
- Removing the subject from the affected area to fresh air resolves respiratory effects within minutes

OC INERT

INSTANTANEOUS BLAST

- Upon initiation of the detonator there is enough force to split at six machined grooves on the outside surface of the canister expelling the powder payload
- Well suited for affecting numerous subjects grouped within a contained area, using wind to the advantage

OC CN CS INERT

FLAMELESS EXPULSION

- This compact grenade features a CO₂ cartridge which utilizes the released pressure to expel the powder payload
- Most commonly used in tactical deployments by Law Enforcement or Corrections and can affect a confined area of up to approximately 1,500 sq ft.

OC CN CS INERT

OC AEROSOL FOGGER

- Delivers a payload of 1.3 MC% in less than 15 seconds and is ideal for area denial areas such as attics or garages with minimal cleanup

PYROTECHNIC CHEMICAL GRENADES

Defense Technology® offers a large assortment of chemical grenades providing options for most any tactical situation. These high-volume pyrotechnic grenades utilize a standard M201A1 type fuze and deliver large plumes of smoke and/or agent. Additionally, all of the grenade options below, except the Flameless Tri-Chamber, can be launched utilizing the Defense Technology launching cup accessory.

LOW ROLL™ TRAINING SIMULATOR

This reloadable training simulator is similar in fit, weight, delay time and deployment procedures to our Low Roll™ Distraction Device® models. It provides a safe way to introduce operators to the use of the Defense Technology® Low Roll Distraction Device product. The reloadable pneumatic simulator will deliver 130 dBA of sound output at 5 feet while not producing any flame, spark, light, heat or marring to the deployment environment.

- Safest way to teach how to deploy a Distraction Device® model
